Re: *State of Oklahoma v. Tyson et al.*,  
No. 05-CV-0329-TCK-SAJ

Dear Counsel:

As you are aware, the agreed biosecurity protocols require that our samplers respect existing biosecurity protocols used on individual property. In order that we can be prepared to comply with these requirements, please provide us with copies of the protocols for those facilities under subpoena as soon as possible. This will allow us to review them, and seek any clarification that might be necessary prior to inspection.

The other issue that I wish to stress is our desire to establish a system that will allow us to gather samples of waste from poultry houses after the birds have been sent to processing and before the waste is disposed of on the fields. Surprisingly, the Integrators have been slow in committing to our proposal. With the cooperation of your clients, we could establish such procedures even in the face of the lack of cooperation by the Integrators. Please let us know if you are interested in working to establish such a process.

Sincerely,

A handwritten signature in black ink, appearing to read 'L W Bullock', is written over a horizontal line.

Louis W. Bullock

Re: State of Oklahoma, et al. v. Tyson Foods, Inc., et al.,  
Case No. 4:05-CV-00329-TCK-SAJ, Northern District of Oklahoma

Dear Mr. Bullock:

We appreciate your letter of May 5, 2006. If the court should allow your client to obtain samples of litter from any of our clients' poultry houses, we would be pleased to provide you with any biosecurity protocol that applies to that property, and to discuss establishing a system to obtain such samples whenever possible after the birds have been removed.

Sincerely,

A handwritten signature in black ink, appearing to be "Michael D. Graves". The signature is fluid and cursive, with a long horizontal stroke at the end.

Michael D. Graves
